The Nature of Engineering Excellence

Who We Are

At Cepeda Systems & Software Analysis, Inc., it is our mission to honor God and become our customers' trusted advisor by delivering best-value services that exceed expectations and contribute to their success.

Community outreach is a key part of who we are. We believe that God has blessed us abundantly so that we can bless others. We are committed to giving back to our community financially, professionally, and personally through our community outreach program.

CSSA was established in 2001. Trees serve as our corporate icon, and signify the wonder of nature, a symbol of life in God's creation – deep roots, winding branches, strength and character. It's the perfect representation of our amazing company whose very nature is engineering excellence.

What Sets Us Apart

- Consistent value in delivery of Engineering and Process Improvement services since 2001
- Excellence and integrity without compromise evidenced by 100% customer satisfaction
- Commitment to quality and continuous improvement demonstrated by CMMI ratings for development & services
- Proven prime contractor and subcontractor
- Focus on matching employee passion with customer needs
- Commitment to do the right thing
- Leadership through serving
- Award winning, financially stable EDWOSB and HUBZone

"I can't say enough good things about Cepeda's courteous, cheerful, servant-minded employees. They are very easy to work with and are always willing to help."

"The CSSA employees that work on my project are the most technically knowledgeable and driven engineers that I've ever worked with. With their knowledge and work ethic, they have all become key essential employees on the project."

"You and your team are instrumental in getting quality software delivered within schedule and budget constraints."

What We Do

CSSA provides software and systems engineering, and process improvement services.

Our systems and software engineering services support our country's Warfighters and NASA's mission to develop the next generation space flight systems. CSSA's services span the complete product life cycle and result in defect avoidance, high end-user satisfaction, reduced risk, improved communication, enhanced operational correctness, task automation, and quality products.

Our process improvement services enhance customers' operations through innovative approaches for optimizing processes. We offer training, consulting, coaching, and appraisal services that help customers establish best practices and sustain them over time. The result: We enable our customers to do more with less; improve the quality of their products and services; improve productivity; and reduce cost and time to market.
