

Introduction to Capability Maturity Model® Integration (CMMI®) for Development Version 1.3 And Services Supplement for CMMI for Development

Cepeda Systems & Software Analysis, Inc. (CSSA), a CMMI Institute Partner and a CMMI-DEV Level 3 and CMMI-SVC Level 2-rated company, is offering a public course in Huntsville, AL, March 25-27 for the CMMI Institute's *Introduction to Capability Maturity Model Integration (CMMI) for Development Version 1.3*. CSSA will also be offering the *Services Supplement for CMMI for Development* course, on March 27. CSSA has been the local premier provider for CMMI training since 2002. We have trained hundreds of students and assisted organizations in successfully interpreting and implementing the model and achieve their business goals and objectives.

Introduction to CMMI Version 1.3 – If you would like to learn how to *develop high quality products and improve delivery of promised product performance, cost and schedule*, this course is for you. This 2.5 day course introduces participants to CMMI for Development (CMMI-DEV) v1.3 and its fundamental concepts. CMMI-DEV is a comprehensive set of guidelines that helps organizations improve their ability to develop, acquire, and maintain quality products. *Introduction to CMMI for Development* helps prepare participants to make valid judgments regarding an organization's implementation of industry's best practices for product development. The course is helpful in identifying issues that are addressed in performing process improvement as defined by the CMMI-DEV model.

The registration fee of \$1,670 includes the CMMI for Development v1.3 book, a course notebook, CSSA-developed quick reference materials, morning and afternoon refreshments, and breakfast and lunch each day. For information on enrolling in the course, please click [here](#).

Services Supplement for CMMI for Development – If you would like to learn how to *ensure the effective delivery of services and achieve superior service quality, controlled costs, improved schedule performance, and high levels of customer satisfaction*, this course is for you. This half-day course introduces participants to the CMMI for Services (CMMI-SVC) model and to fundamental concepts related to service delivery. CMMI-SVC defines effective practices that ensure quality services are delivered to customers and end users. Domains that would benefit from using CMMI-SVC include operations, logistics, maintenance, IT, engineering, program management, and many other services in government and industry. The Introduction to CMMI-DEV class is a prerequisite for the Services Supplement for CMMI for Development class.

The registration fee of \$600 includes the CMMI for Services model, a course notebook, a CSSA-developed CMMI-SVC quick reference guide, and refreshments. For information on enrolling in the course, please click [here](#).

These courses fulfill a prerequisite requirement for an official CMMI Institute Introductory CMMI for Development or CMMI for Services course, and are a prerequisite for being a Lead Appraiser, Team Leader, or Team Member on a SCAMPI appraisal using the CMMI-DEV or CMMI-SVC models. Enrollment for these courses is limited. CSSA reserves the right to cancel this class in advance. Refunds will be given.
