

## Corporate Overview

Cepeda was established in 2001. At Cepeda, it is our mission to be the most trusted, responsible, and innovative partner, shaping the future through groundbreaking engineering, software development, and process improvement that inspires and empowers our customers. Our Systems and Software engineering services support our country's Warfighters and NASA's mission to develop the next generation space flight systems. Our process improvement services enhance customer's operations through innovative approaches for optimizing processes.
